

- Up to 50% Energy Savings
- Air or Water Cooled
- Low Noise and vibration
- Compact
- Low Maintenance Cost
- Cost Effective

Introducing our Chillers, a cost-effective and compact solution for your cooling needs. These chillers are designed with efficiency in mind, offering up to 50% energy efficiency. They feature variable speed compressors that ensure optimal performance, coupled with a low starting current that enhances their energy-saving capabilities.

What sets our chillers apart is their minimal noise and vibration levels, making them an ideal choice for environments where quiet operation is essential. They are available in both water-cooled and air-cooled variants, providing flexibility based on your specific requirements. Moreover, these chillers are designed for low maintenance, reducing the overall cost of ownership. Manufactured to meet your specific needs, our range includes quality industrial water chillers and screw type chillers, offering a comprehensive solution for all your cooling needs.
