MODULAR FLAT BELT CONVEYOR

- Flexible Modular Design
- Incline or Flat
- Wheels or Feet
- Optional Integrated Metal Detector

The Modular Flat Belt Conveyor, a versatile solution tailored to your unique needs. This conveyor's modular design allows for custom dimensions, ensuring a perfect fit for your space. Whether you require an incline, a flat setup, or a combination of both, this conveyor can be adapted to meet your specifications.

The conveyor is controlled by a variable speed drive, allowing you to adjust the speed as needed. This feature is particularly useful allowing scrap to cool before it enters the grinder. To further enhance your operations, an integrated metal detector is available to protect your grinder and regrind from contamination. The Modular Flat Belt Conveyor is more than just a conveyor—it's a comprehensive solution designed to optimize your process.

Specifications

Power Requirements: 1Ø 120VAC 9A
